

# INVESTOR'S EDGE

## DAO (\$TED)

White Paper

## Welcome To Investor's Edge DAO

Investor's Edge DAO Token is a cryptocurrency that aims to help everyone around the world find relief from institutional financial restrictions. Our token allows anyone, anywhere to send and receive funds almost instantly with extremely low fees. We aim to make inflation obsolete. Inspired by the Investor's Edge DAO given to us by the founding fathers, we hope to provide Investor's Edge DAO from bankers and financial restrictions by offering the public a chance to engage in free market capitalism through decentralized trading and investing.

Investor's Edge DAO platform plans to serve as a conduit between traditional banking services and the digital asset economy. It is intended that users will be able to make a payment or transact through a wide range of channels, e-wallet, direct transfer between users which is P2P. With our setup, our investors will be able to make huge profit everyday using our token. Let us guide you through the world of trading. It's a honor to welcome you at Investor's Edge DAO.

The money stored in your wallet is already protected and encrypted. Its safety doesn't depend on the network's reliability. Your money is always safe.

## What Is Investor's Edge DAO?

Investor's Edge DAO is an affordable crypto-investment platform with high growth potential due to the implementation of its decentralized storage system deemed vastly superior to traditional cloud storage systems. Investor's Edge DAO token's low cost allows investors greater flexibility as well as the potential for significantly higher returns.

Which would make global transactions easier, faster, and more secure, putting control directly in the hands of the concerned parties. This could also eliminate banks and money transfer services. Securitizing data, identity protection, creation of a decentralized economy, and storing personal data securely are a few of the initial purposes for which the blockchain technology was brought to life. Cryptocurrency is a growing mega-trend, which is being recognized worldwide and is being adopted for daily transactions. Nearly every global bank is experimenting with blockchain technology as they try to unleash the cost savings and operational efficiencies it promises to deliver. Decentralized storage platform secured by blockchain technology.

## Why Investor's Edge DAO Token

Investor's Edge DAO is a secure, public and decentralized cryptocurrency, built with on DeFi platform. Privacy and security come naturally from using Investor's Edge DAO. It is the best solution for those who want to keep their financial privacy from traditional platform.

Investor's Edge DAO full-stack DeFi ecosystem, changing the embarrassing situation of the existing meme-type tokens lacking in ecology, and forming a community corresponding to the exclusive financial ecology.

All transactions enjoy the benefit of Blockchain security. Blockchain has emerged as one of the most disruptive technologies in recent times and has addressed many of the major security issues concerning financial transactions.

Instant transactions are provided all around the world by the Investor's Edge DAO Network, they are totally untraceable, and they don't require any additional fees.

INVESTOR'S EDGE DAO token is a scalable digital asset offering the instant, on-demand transactions required in today's world. Investor's Edge DAO token transactions typically occur in a matter of seconds. offering a unique model of exchange that is safe and secure.

## Investor's Edge DAO Transactions

Unlike fiat money transactions, where your money is processed through an intermediary, bank, or financial institution, transactions between Investor's Edge DAO users are carried out over the Internet which makes the transactions much more reliable.

Transaction is protected by secure cryptographic algorithms whereby no one can identify who sent the money, who the receiver was, and what amount of money was transferred.

## Our Vision

Our vision is to inherently develop a project which comprises of virality and humour to ensure that the community will stay interested. We will ensure we market this project such that it brings an atmosphere of joy within all investors.

Investor's Edge DAO's purpose is to offer a secure ecosystem for its investors, giving them the opportunity to sleep well at night without fear of being conned. The team is always active on Telegram, where they are eager to engage with their users through voice chat or text. In this place, the team values integrity and honesty, and they will work endless hours to demonstrate it.

## Our Mission

Investor's Edge DAO has developed a competitive public blockchain based on DeFi platform and Investor's Edge DAO coin (\$IED) will be sold on different exchanger platforms. The consensus algorithm adopted from the Byzantine fault tolerance based delegated proof of stake (BFT-DPos) assures the verification of transactions on the Investor's Edge DAO Blockchain as well as its performance.

The protocol we are working on is a set of the standards used on DeFi platform. It is also compatible with all of the blockchain contracts written by a high-level programming language and implements DeFi protocols.

Our mission is to enable the next generation of many-to-many transaction on decentralized applications. By building on top of existing blockchains, our applications will be able to be deployed in a peer-to-peer environment, with complete fairness, transparency, and visibility. We believe Investor's Edge DAO is revolutionary and will change everyone's expectations of how fair and fast trading and investment can be.

# Technical advantages of Investor's Edge DAO

Investor's Edge DAO will always focus on delivering real, real-time and sustainable data value to users, expanding the ecological boundary of trusted sharing.

## 1) Information access

Users can maintain their own digital assets at any time, and set up corresponding modes for different types of digital assets, including private, public, charging, etc., as well as pricing digital assets in the charging mode.

## 3) Improve transaction speed

Through the optimization of key links such as signature algorithm, ledger structure, data operation, serialization, consensus mechanism, and message diffusion Investor's Edge DAO will achieve fast transaction verification in seconds. Satisfy the user experience of most DeFi application scenarios.

## 3) Increase data storage

The double-entry bookkeeping mode of the blockchain has accumulated a large amount of data in the continuous application of the system, resulting in a decrease in the running speed. Investor's Edge DAO will implement separate storage and table-based storage mechanisms to achieve mass storage of DeFi data.

## 4) High throughput

The essence of blockchain is a distributed shared accounting technology, and its distributed characteristics are mainly reflected in distributed consistency rather than distributed concurrent processing. In order to ensure data consistency and prevent

A network diagram with red nodes and lines on a black background. The nodes are of varying sizes and are connected by thin red lines, forming a complex web. The background is black, and the nodes and lines are a vibrant red color.

Byzantine general's problem, some specific links can only be executed serially, but not in parallel. Through long-term testing and optimization practice, Investor's Edge DAO will further greatly improve the transaction throughput based on the Blockchain Network.

### **5) Fast synchronization of node data**

Investor's Edge DAO will develop a mirroring mechanism, which can regularly mirror the local ledger to realize a convenient rollback mechanism. Under a unified consensus, the mirror label can be specified for rollback; at the same time, the newly added nodes can be shortened. Join the running cycle, only need to synchronize the latest mirror and a small number of recent transaction sets, you can integrate into the network and participate in consensus verification.

## \$IED – The Native Token of Investor’s Edge DAO

Dogecoin(DOGE), Shiba Inu (SHIB), and Dogelon Mars (ELON) are among the most successful Meme projects among others. Each has provided valuable features to their users and attracted liquidity into their protocols. The native tokens of DeFi protocols have shown tremendous potential for upside price appreciation.

The Investor’s Edge DAO coin economics are modelled similarly to these successful Meme projects. Investor’s Edge DAO coin can be used to access advanced features within ecosystem while also providing holders with opportunities to generate greater interest.

### Token Summary

Token Allocation	Tokens Amount	Supply Percentage	Token Price	TGE Marketcap	Vesting Period
Liquidity pool		40%	N/A		
Owner		60%			
<b>BUY TAX:</b>					
reflections		8%			
Liquidity		3%			
Marketing		2%	N/A		
Team		1%			
<b>SELL TAX:</b>					
RewardS		6%	N/A		
Marketing		4%			
Liquidity		3%	N/A		
Team		1%	N/A		
Total Supply	1,000,000,000,000,000	100%	TGE Marketcap	197.500\$	

# Roadmap

## PHASE 1

- Twitter buildout
- Website buildout
- Discord buildout
- 500 token holders
- Establish DAO
- \$1M market cap
- Aggressive Marketing & Promo
- Deploy Investor's Edge DAO token
- 2500 Twitter followers

## PHASE 2

- 1500 token holders
- Develop 10k NFT Collection
- Whitepaper
- Aggressive Marketing, Promo & Branding
- \$5M market cap
- Onboard community Leaders (25-50 varying industries)
- Retain team (in house Devs, artists & marketing)
- Earn WL/presale access by holding minimum \$200 in IED token
- Establish community fund
- 5k Twitter followers

## PHASE 3

- 3000 token holders
- Launch presale
- \$15M market cap
- Launch public sale
- Floor sweeps to maintain value of collection
- Giveaways (NFTs, mentorships, crypto & more)
- 10k Twitter followers
- Develop Investor's Edge University P2E

## PHASE 4

- Deposit 70% of ETH from NFT sales in community fund
- 6000 token holders
- \$50M market cap
- Staking Deployment
- Continuous floor sweeps to maintain value of collection
- Acquire Metaverse Land
- Acquire IRL Real Estate
- Launch Investor's Edge University P2E
- 25k Twitter followers

## PHASE 5

- Community voted giveback when collection SOLD OUT
- 15k token holders
- \$250M market cap
- Continuous floor sweeps to maintain value of collection
- Royalties in form of IED tokens & USDC to ALL HODLers (quarterly in perpetuity)
- Merch & digital assets
- IRL meetups & events
- 50k Twitter followers

## Disclaimer
